## **1. Nature of operations and going concern**

Honey Badger Exploration Inc. (the "Company") was founded in 1992 for the purpose of the acquisition, exploration, and development of mining properties. The Company's head office and the primary location of its registered records is 145 Wellington Street West, Suite 1001, Toronto, Ontario M5J 1H8. The Company owns a wholly owned subsidiary 606596 Alberta Ltd.

As at March 31, 2019, the Company had a working capital of \$600,656 (December 31, 2018 - \$670,213) and an accumulated deficit of \$9,419,539 (December 31, 2018 - \$9,349,984). These conditions cast significant doubt about the Company's ability to continue as a going concern.

The accompanying condensed interim consolidated financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company is currently in the exploration stage and has not commenced commercial operations.

In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company's ability to continue operations and fund its mining interest expenditures is dependent on management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

These condensed interim consolidated financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore need to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying condensed interim consolidated financial statements.

## **2. Significant Accounting Policies**

### ***(a) Statement of compliance***

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). IFRS comprise IFRSs, International Accounting Standards ("IAS") and interpretations issued by the IFRS Interpretation Committee ("IFRIC")s and the former Standing Interpretations Committee ("SIC")s).

The consolidated financial statements were approved by the Board of Directors on **May 29, 2019**.

### ***(b) Basis of presentation***

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that have been measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

### ***(c) Basis of consolidation***

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary 606596 Alberta Ltd., which is not active and has no assets in the current or prior year. All intercompany balances and transactions have been eliminated.

## **3. Significant accounting judgements, estimates and assumptions**

The preparation of financial statements in accordance with IFRS requires management to make judgement, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Judgements, estimates and assumptions are continuously evaluated and are based on management's best knowledge of the relevant facts and circumstances, having regard to previous experience. However, actual outcomes may differ from the amounts included in the financial statements.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could have an effect on the amounts recognized in the financial statements relate to the following:

**Honey Badger Exploration Inc.**  
**Notes to condensed interim consolidated financial statements**  
*For the three months ended March 31, 2019 and 2018*

---

*Going concern*

The preparation of the financial statements requires management to make judgments regarding the going concern of the Company as previously discussed in Note 1 of the financial statements.

*Deferred taxes*

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and deferred tax provisions or recoveries could be affected.

*Deferred Flow-Through Premium Estimates*

Recorded costs of flow-through share premium liabilities reflect premiums received by the Company on the issue of flow-through shares. The premium is subject to measurement uncertainties and requires the Company to assess the value of non-flow-through shares. The determination is subjective and does not necessarily provide a reliable single measure of the fair value of the premium liability. The fair values of the flow-through premiums are disclosed in Note 7 of the financial statements.

*Share-based compensation*

Estimating fair value for granted stock options requires determining the most appropriate valuation model which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the option, volatility, dividend yield, and rate of forfeitures and making assumptions about them. The value of the share-based payment expense for the year along with the assumptions and model used for estimating fair value for share-based compensation transactions are disclosed in Note 8(b) of the financial statements.

*Deferred Compensation*

From time to time the Company accrues compensation, included in accounts payable and accrued liabilities, which represents future compensation for management services and involves significant management judgments. The Company reviews the deferred compensation balance annually to ensure the balance appropriately represents the Company's estimate of what will be paid in cash or settled through share-based payments in future periods. Any reduction is recorded as a forgiveness of deferred compensation costs.

**4. Cash and cash equivalents**

As at March 31, 2019 and December 31, 2018, cash and cash equivalents were held as follows:

	<b>March 31, 2019</b>	December 31, 2018

**8. Shareholders' deficiency**

(a) *Common shares*

The Company's authorized capital stock includes an unlimited number of common shares (issued 74,370,824 common shares) having no par value. (See Note 15 – Subsequent Events.)

(b) *Stock Options*

The Company has a stock option plan (the "Plan") pursuant to which the Company's Board of Directors may grant incentive stock options to directors, officers, employees and consultants at the discretion of the Board of Directors. The exercise price of the options cannot be less than the closing price of the Company's shares on the trading day preceding the date of grant and the maximum term of any option cannot exceed five years. The Board, in accordance with applicable Exchange or other regulatory requirements, if any, will determined the vesting period. There is no minimum vesting period unless the optionee is engaged in Investor Relation activities, The maximum aggregate number of common shares under option at any time under the Plan cannot exceed 10% of the issued shares. The fair value of the share-based compensation is recognized as contributed surplus upon vesting.

During the three months ended March 31, 2019, the Company granted nil stock options to directors and officers of the Company.

For the three months ended March 31, 2018 the Company granted 850,000 to a director and officer of the Company at a weighted average exercise price of \$0.055. These three-year options vested immediately upon grant. The fair value of the stock options granted has been determined to be \$48,826 and has been included in the statement of loss and comprehensive loss for the three months ended March 31, 2018. The fair value of the stock options was calculate using the Black-Scholes option pricing model and utilized the following weighted average assumptions: risk-free rate - 1.94%; volatility – 230.6%; expected life - 3 years; dividend yield - 0% and forfeiture rate - 0% and resulted in a weighted average fair value of \$0.057 per stock option.

(c) *Warrants*

The Company has issued warrants as part of equity financings. The fair value of warrants is recognized upon issuance as an equity reserve until expiration or exercise.

As at March 31, 2019, the Company had 21,708,037 (Q1 2018 – 16,684,411) warrants outstanding with a weighted average exercise price of \$0.13 (Q1 2018 - \$0.069).

**9. Related party disclosures**

## **12. Commitments and contingencies**

### **Flow-Through Expenditure Commitments**

The Company competed flow-through share financings that involve a commitment to incur Canadian Exploration Expenditures (“CEEs”) prior to the end of specific calendar years and to renounce the CEE tax deductions to the subscribers. The flow-through commitments as at March 31, 2019 is \$846,993 (December 31, 2018 - \$365,942).

## **13. Capital management**

As of March 31, 2019, the Company had a working capital of \$600,656 (2018 - \$670,213).

There were no changes in the Company's approach to capital management during the three months ended March 31, 2019.

In managing liquidity, the Company's primary objective is to ensure the entity can continue as a going concern while raising additional funding to meet its obligations as they come due. The Company's operations to date have been funded by issuing equity.

The Company's investment policy is to invest excess cash in very low risk financial instruments such as term deposits or by holding funds in high yield savings accounts with major Canadian banks. Financial instruments are exposed to certain financial risks, which may include currency risk, credit risk, liquidity risk and interest rate risk.

The Company's mineral property interests are all in the exploration stage, as such the Company is dependent on external financing to fund its exploration activities and administrative costs. Management continues to assess the merits of mineral properties on an ongoing basis and may seek to acquire new properties or to increase ownership interests if it believes there is sufficient geologic and economic potential.

Management mitigates the risk and uncertainty associated with raising additional capital in current economic conditions through cost control measures that minimizes discretionary disbursements and reduces exploration expenditures that are deemed of limited strategic value.

The Company manages the capital structure (consisting of shareholders' deficiency) on an ongoing basis and makes adjustments in response to changes in economic conditions and risks characteristics of its underlying assets. Adjustments to the Company capital structure may involve the issue of new shares, issue of new debt, acquisition or disposition of assets, or adjustments to the amounts held in cash, cash equivalents and short-term investments.

The Company is not subject to any externally imposed capital requirements other than flow-through spending.

#### **14. Financial instrument risk factors**

The following disclosures are to enable users of the consolidated financial statements to evaluate the nature and extent of risks arising from financial instruments at the end of the reporting year:

*a) Credit risk*

The Company's credit risk is the risk of counterparty default on cash and cash equivalents held on deposit with financial institutions. The Company manages this risk by ensuring that deposits are only held with large Canadian banks and financial institutions. The Company's amounts receivable related to sales taxes have negligible counterparty default risk. The Company's amounts receivable related to companies related by common management are subject to counterparty default risk.

*b) Liquidity risk*

The Company's liquidity risk is the risk that Company has insufficient funds to settle its contractual financial liabilities. The Company manages this risk by ensuring sufficient funds are available as contractual cash flows become due.

As at March 31, 2019, the Company had a cash balance of \$1,079,488 (December 31, 2018 - \$1,132,962) to settle current liabilities of \$494,715 (December 31, 2018 - \$486,641). As a result, the Company is exposed to liquidity risk.

While the Company has been successful in obtaining required funding in the past, there is no assurance that future financings will be available.

*c) Market risks*

The Company's market risk arises from changes in interest rates and commodity prices that could have an impact on profit or loss. This includes:

- Interest rate risk, is the sensitivity of the fair value or of the future cash flows of a financial instrument to changes in interest rates. The Company does not have any financial assets or liabilities that were subject to variable interest rates.
- Commodity price risks, particularly with respect to diamonds, is the sensitivity of the fair value of or of the future cash flows of mineral assets. The Company manages this risk by continually monitoring base and precious metal prices and commodity price trends to determine the appropriate timing for funding the exploration or development of its mineral assets, or for the acquisition or disposition of mineral assets.
- Currency risk, is the sensitivity of the fair value or of the future cash flows of financial instruments to changes in foreign exchange rates. The Company does not have any financial assets or liabilities that were subject to variable foreign exchange rates and as such the Company is not subject to currency risk.
